

SHOOT PROJECT

The SHOOT project aims to reimagine the role of digital photography in education, using it as a tool for immersive and inclusive learning. By focusing on teaching through photography, SHOOT leverages students' existing familiarity with smartphones and digital tools to foster creativity, reflection, and collaboration. This approach addresses key challenges in education, particularly for students at risk of early school dropout or those with special educational needs (SEN). The project aims to make learning more accessible, interactive, and engaging, offering a powerful alternative to traditional education methods while also raising awareness about digital literacy and the potential of technology to bridge educational gaps. The SHOOT project not only focuses on academic learning but also aims to promote inclusivity, collaboration, and active democratic participation.

PROJECT OBJECTIVES

- ✓ **Digital Photo Storytelling Methodology**
- ✓ **Immersive Classroom**
- ✓ **SHOOT Immersive Experience**
- ✓ **Increased Accessibility**
- ✓ **Personalized Learning**
- ✓ **Skills Development**
- ✓ **Sustainability**
